

## GOVERNOR WILL AID JACKSON FUND

Sets Anniversary of Stonewall's Birth for State-Wide Contributions.

GET OTHER STATES TO HELP

Southern Governors Will Be Requested to Join in Great Memorial.

Governor Mann approved yesterday the plan for holding a tag day throughout Virginia on January 21, the anniversary of the birth of General Stonewall Jackson, for the purpose of raising funds for the erection of an equestrian monument to Jackson in Richmond. Governor Mann also indicated that he would write personally to the Governors of the various Southern States sending troops to the Confederate army, and suggest to them the propriety of taking similar action. The management of the tag day throughout the South will be in the hands of the Daughters of the Confederacy, the plan having been approved by the Virginia Division at its recent meeting in Richmond.

The matter was laid before the Governor yesterday morning by a delegation representing the Stonewall Jackson Monument Association, consisting of Rev. James Power Smith, D. D., president; General W. W. Sale, Captain W. M. Myers, Edwin P. Cox, T. Peyton W. Smith, Col. W. S. Archer and others. Letters approving the plan and regretting their inability to appear before the Governor in its support were received from Judge George L. Christian and John Stewart Bryan.

Dr. Smith explained to the Governor that it was planned, through the active aid of the Daughters of the Confederacy, to make January 21, 1914, "Stonewall Jackson Monument Day," when contributions for the proposed monument will be asked throughout the State. The only monument to Jackson in Richmond, Dr. Smith said, was the General's statue in the Capitol Square, the gift of Englishmen, Virginia having provided in its capital city an adequate memorial. Attention was called to the fact that some of the people of this State and then on the whole South to join in the erection of a fitting and permanent memorial.

E. D. Hotchkiss, general freight agent of the Chesapeake and Ohio Railway Company, in treasurer of the fund, to which some contributions have already been made.

ALL THE MODERNITIES.

Anderson's Carpet House

The committee recommended for passage the ordinance granting to the Atlantic Coast Line Railroad permission to extend certain stub-end tracks two feet into the sidewalk of Canal Street near Ninth. The ordinance was recommended by the Common Council at its last meeting for examination into the advisability of permitting a railroad company to encroach upon the sidewalks of the city.

Representatives of the road emphasized the necessity of the permit in order to enable it to handle the congested freight situation. The committee amended the original ordinance by inserting the provision that the extension shall be permitted for a period not exceeding five years, and in this form sent it to the Council.

JURORS TOO EASILY FOOLED

Judge Dismisses Men Who Vote to Quit.

(Special to The Times-Dispatch.)

Asheville, N. C., October 13.—Because eleven members of the jury which heard the case of Sam Shaw, charged with retailing, voted to acquit the defendant, Judge Frank Carter, at this morning's session of Superior Court, dismissed these, whom he declared were too easily fooled. In a court address to the jury, Judge Carter declared that he does not intend that men charged with retailing and bootlegging should find it as easy to get away at this term of court as they did at a recent session. The time has come when Buncombe County does not want dealers in whiskey to go free on flimsy evidence, the judge said, and he stated that he should be permitted for a period to acquit a man against whom such evidence can be secured as was introduced in the case of Shaw.

The judge ordered that a mistrial be ordered, and the defendant was placed in jail to await trial at the approaching term of the Superior Court.

MONUMENT AVENUE EXACTS ITS PRICE

O'Keefe Finds That Honor of American Automobile Association to Hold Annual Meeting in December.

Lived on Fashionable Avenue or Franklin.

Living on Monument Avenue may improve one's credit at the shops, and may otherwise add to the resident's social and commercial well-being, but it has its drawbacks, too. The State tax assessors, it appears, have paid tribute to the avenue's desirability for residential purposes by appraising property on that thoroughfare at a rate to correspond with its advantages.

The matter was aired yesterday before the Council Committee on Streets, which was asked some time ago by T. O'Keefe to establish definitely whether his residence, which is located at 3035 Franklin Street or 3035 Monument Avenue. If the first named address was correct, then he wanted a reduction in his assessment, because his property was appraised at Monument Avenue rates. It was true that he lived on Monument Avenue, then well and good.

City Attorney Decides.

The Council Committee was not prepared to pass on the question, and passed it along to the City Attorney. Mr. O'Keefe's house, it appears, fronts on the angle formed by the intersection of Monument Avenue and new West Franklin Street, which begins at West Street, and runs westward into Monument Avenue. It could with equal justification be said to front on either street.

Mr. O'Keefe had no comment to make on the decision. If residence on Monument Avenue is sufficient to heal the financial hurt it carries with it, he will probably pursue the matter no further. The question of reduction in assessment, it was stated, will have to be taken up with the State authorities.

Discuss Bridge Grade.

The committee spent half an hour considering the question of the resolution establishing the true grade of the approach to the south side of the Mayo Bridge. The resolution, accompanied by a blue print of the proposed grade, prepared by an assistant in the City Engineer's office, was presented for consideration.

R. S. Crump, of the Standard Paper Manufacturing Company, objected that the proposed grade as indicated on the blue print would seriously injure his company's property by raising the level of the roadbed as high as the door knob of the company's office building at its own state and then on the whole South to join in the erection of a fitting and permanent memorial.

Wheelwright, president of the Virginia Railway and Power Company, entered objection to the plan because of expensive track changes that it would involve.

Should Decide Now.

City Engineer Bolling told the committee that, while he would not insist that the permanent grade of the south bridge approach be fixed at this time, the matter should not be delayed. Much of the property along the approach, he pointed out, was unoccupied, and if no permanent grade was established, the city would be liable to heavy damages, which might be demanded when it attempted later to establish a grade after the vacant property had been built upon.

An examination of the blue print by the City Engineer revealed several inaccuracies, and upon his recommendation the whole matter of establishing a permanent grade for the southern as well as the northern approach to the bridge was postponed until the next regular meeting of the committee. At that meeting the City Engineer will present a corrected plan of the grade as he would recommend it.

Grants Coast Line Permit.

The committee recommended for passage the ordinance granting to the Atlantic Coast Line Railroad permission to extend certain stub-end tracks two feet into the sidewalk of Canal Street near Ninth. The ordinance was recommended by the Common Council at its last meeting for examination into the advisability of permitting a railroad company to encroach upon the sidewalks of the city.
